

SPOT NZ hires and sells GPS tracking and communication devices to people in many different situations. It provides a vital line of communication with friends and family when you want it, and emergency assistance when you need it. Tracking for multisport events and outdoor adventurers, 2-way Satellite communications for people and groups going off-grid, whatever your destination we can keep you in-touch with the World.

SPOT devices deliver affordable, reliable, location-based tracking, messaging and life-saving S.O.S. technology to hundreds of thousands of users around the world....24/7/365. Using one of the newest mobile satellite networks in the industry, SPOT devices provide dependable service completely independent of terrestrial infrastructure and whenever employees and assets are in remote areas where regular cellular or landline communications are unavailable. Combined with their small size, durability and scalability, SPOT devices are ready to help your business.

The Spot Gen 3 GPS Satellite Messenger provides a vital line of communication with friends and family when you want it, and emergency assistance when you need it. Using 100% satellite technology, SPOT works virtually anywhere in the world, even where cell phones don't – all with the push of a button.

DISCOVER THE INREACH DIFFERENCE

Garmin products that include inReach technology can empower you to stay connected, even when you're venturing off the grid. All inReach solutions offer you these essential capabilities:

Global 2-way communication - Send and receive text messages or emails from anywhere in the world and receive a delivery confirmation

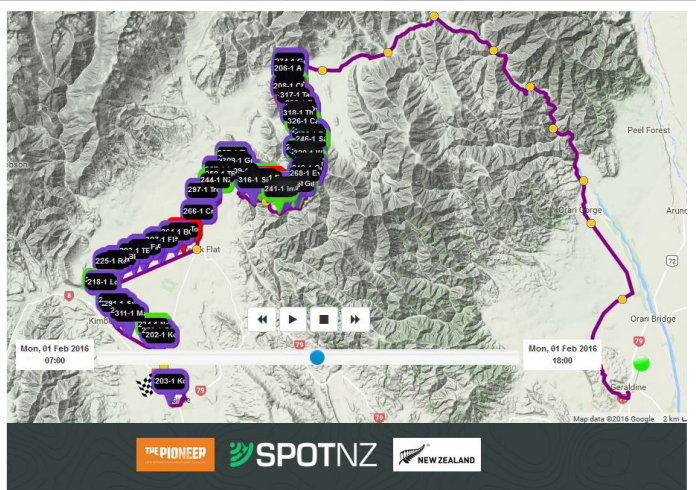

Professional SOS monitoring - In case of emergency, trigger an interactive SOS message to NZ Rescue Co-Ordination Centre—communicate the nature of your emergency and have the peace of mind that help is on the way

Tracking and sharing - Plan and track your trip, share your location, and let others ping your device or follow your journey.

100% global coverage - Iridium is the world's furthest reaching satellite network that provides 100 percent global coverage with no fringe zones or blackout areas.

SPOT TRACE

Fleet and equipment managers know that asset management and loss prevention are two of their biggest and costliest concerns. Now thanks to SPOT Trace®, asset tracking, monitoring, theft-alert and recovery have never been easier and more affordable, especially when your equipment is located in very remote worksites that are hard and expensive to get to. SPOT Trace is small, easy to install and deploy, has long battery life and allows managers to view the exact location within 8 meters. The Spot Trace can be configured to track any asset, from Farm bikes, boats, mountain bikes and vehicles to expensive stock. Bust the rustlers with our Geo-fence technology, once the tracked asset leaves the farm or selected area you will be immediately notified and can follow the asset to collect it from the would-be thief. Add in the Police and it will be a long time before they come back.

Partnered with our hosting company TrackMe.kiwi we can bring your event alive, we have the biggest hire fleet of satellite tracking devices in Australasia. Remote challenging locations are our specialty, from 5 teams to 500 we cover them all. For the best experience you can give your athletes, and their followers, choose TrackMe to deliver your satellite tracking. Dedicated servers and pages for fans to follow online with mobile optimised displays, tracking periods from as low as 30 seconds, administration access to allow for accurate race management are just some of the features.
